

'MIRA' BLACK OUTDOOR SAUNA

Made in Europe | Quality Guaranteed

The beautiful 'Mira' Sauna, with its sleek black finish, promises to transform your al fresco space into a personal wellness retreat. Crafted in Europe with expert precision, it's perfect for outdoor areas of any size.

'Mira' can be installed on terraces, balconies and smaller gardens, with the small, lightweight components enabling easy hoist-free assembly. The S and L size options, which can accommodate up to three and six users respectively, allow you to make the most of the available space in your outdoor area.

KEY FEATURES

SLEEK BLACK DESIGN

The painted black finish of the Thermo Spruce exterior is guaranteed to enhance the look of any outdoor area.

DELUXE MATERIALS

A Thermo Spruce exterior and Thermo Aspen interior offer perfect Sauna conditions. A full glass door creates a spacious feel.

HEATER

Select a heater that combines top functionality with elegant aesthetics (sold separately).

EUROPEAN CRAFTSMANSHIP

This premium Outdoor Sauna has been meticulously designed by expert European craftspeople.

INTERIOR LED LIGHTING

High-quality embedded LED lighting behind the backrest works to add an extra-stylish touch.

EASY INSTALLATION

Small, lightweight components offer easy, hoist-free assembly. Choose to install yourself or let our expert team take care of it!

An aerial photograph of a lush, dense forest. The trees are a mix of green and dark green, with some taller, darker evergreens on the right side. In the bottom left corner, a small section of a river or stream is visible, flowing through the forest. The overall scene is a vibrant, natural landscape.

SDS Australia takes pride in using
timber materials that meet high standards
of environmental sustainability.
Our supplier is committed to finding
balanced solutions for smart wood production
that minimise environmental impact.

Reducing the carbon footprint of a building is a major challenge for the entire construction industry. Manufacturers of building materials can play a major role by investing in product development, energy efficiency and renewable energy to ultimately reduce the environmental impact of their products. It is possible to produce sustainable materials, products and solutions with a smaller carbon footprint.

Thermally treated wood is a good alternative to other building materials, as carbon emissions from wood are reduced during thermal treatment and the life of the wood is extended.

Responsible wood sourcing

Our supplier carefully monitors where the wood comes from.

They only source the best quality wood from sustainably managed forests around the world. This helps reduce the negative impact of deforestation.
