

EUROPEAN OUTDOOR BARREL SAUNA – NATURAL EDITION

Experience Unmatched Quality and Comfort

Get ready to experience the ultimate Barrel Sauna! Crafted from Thermo Wood, you'll be indulging in luxury thanks to a sleek and spacious design.

These European Barrel Saunas boast thicker walls and offer unparalleled insulation and stability – designed with 40mm Nordic Thermo Spruce and premium Thermo Aspen flooring and benches.

Crafted to complement its natural surroundings, the Natural Outdoor Barrel Sauna provides a haven where you can unwind and reconnect. All saunas come with free roof shingles, LED wall lights and switch, and half panoramic window (optional). Heaters are sold separately.

Sauna Floor & Benches

FEATURES

LED Wall Lights

Beautiful lighting to enhance your sauna experience.

Half Panoramic Window

Enjoy dramatic views of your surroundings, whether it's the bush, mountains, or just your backyard.

Thermally Modified Wood

Thermal modification is a chemical-free process that enhances real wood – providing unmatched strength, stability, and better insulation.

Ready for All Weather

Our Thermo Barrel Saunas come with superior bitumen hexagonal roof shingles for the Australian climate.

THERMO-MODIFIED WOOD

The heat enhances the wood's structure throughout.

Steam allows for full control over the modification process.

THERMALLY MODIFIED WOOD

is natural – its properties are enhanced using just heat and steam. This chemical-free process results in an eco-friendly and aesthetically pleasing material that's significantly more durable and stable than conventional timber.

STABILITY

Dimensionally stable in changing weather conditions

DURABILITY

Highest available durability class for real wood

ECO-FRIENDLY

Chemical-free modification

LIGHTWEIGHT

Easy handling and reduced thermal conductivity

LOW MAINTENANCE

Oil it or not, the choice is yours

Our Barrels Saunas come in different sizes to suit your needs.

SDS Australia is proud to source timber from Thermory, with their commitment to environmental sustainability. They aim to find balanced solutions for smart wood production that reduce the environmental impact.

Reducing the carbon footprint of a building is a major challenge for the entire construction industry. Manufacturers of building materials can play a major role by investing in product development, energy efficiency and renewable energy to ultimately reduce the environmental impact of their products. It is possible to produce sustainable materials, products and solutions with a smaller carbon footprint.

Thermally treated wood is a good alternative to other building materials, as carbon emissions from wood are reduced during thermal treatment and the life of the wood is extended.

Responsible wood sourcing

Thermory carefully monitors where the wood comes from.

They only source the best quality wood from sustainably managed forests around the world. This helps reduce the negative impact of deforestation.
