

‘KAIA’ OUTDOOR SAUNA

‘Kaia’ is a contemporary outdoor sauna collection designed for those who value architectural simplicity, premium craftsmanship and efficient use of space. Its clean geometry, distinctive timber profile and compact proportions make it a natural addition to Australian backyards, gardens and holiday homes.

Choose ‘Kaia Classic’ for a private, space-saving sauna retreat, or ‘Kaia Terrace’ for additional outdoor functionality and the architectural character of a signature round window. Both models bring together European craftsmanship, thermally modified timber and a thoughtfully designed sauna interior for comfortable everyday use.

KEY FEATURES

PREMIUM MATERIALS

Thermally modified pine, thermo-aspen benches and a durable metal roof provide lasting quality in Australian

BUILT FOR AUSTRALIAN CONDITIONS

Thermally modified timber, a durable anthracite metal roof and a strong aluminium-framed door provide reliable performance in changing Australian outdoor conditions.

COMPACT CONTEMPORARY DESIGN

Clean architectural lines and efficient proportions make Kaia ideal for Australian backyards, gardens and holiday homes.

AMBIENT LED LIGHTING

Warm LED lighting behind the backrest creates a soft and inviting sauna atmosphere.

EUROPEAN CRAFTSMANSHIP

This premium Outdoor Sauna has been meticulously designed by expert European craftspeople.

EASY INSTALLATION

Prefabricated components and flat-pack packaging allow for efficient transportation and straightforward on-site assembly.

Central Finland

SDS AUSTRALIA TAKES PRIDE IN USING TIMBER MATERIALS THAT MEET
HIGH STANDARDS OF ENVIRONMENTAL SUSTAINABILITY. OUR SUPPLIER
IS COMMITTED TO FINDING BALANCED SOLUTIONS FOR SMART WOOD
PRODUCTION THAT MINIMISE ENVIRONMENTAL IMPACT.

Reducing the carbon footprint of a building is a major challenge for the entire construction industry. Manufacturers of building materials can play a major role by investing in product development, energy efficiency and renewable energy to ultimately reduce the environmental impact of their products. It is possible to produce sustainable materials, products and solutions with a smaller carbon footprint.

Thermally modified wood is a durable, chemical-free alternative to other building materials that can extend the life of timber products – helping to reduce environmental impact over time.

The mark of
responsible forestry

RESPONSIBLE TIMBER SOURCING

Our supplier carefully monitors where the wood comes from.

They only source the best quality wood from sustainably managed forests around the world. This helps reduce the negative impact of deforestation.

THERMO-MODIFIED WOOD

The heat enhances the wood's structure throughout.

Steam allows for full control over the modification process.

THERMALLY MODIFIED WOOD

This natural timber's properties are enhanced using just heat and steam. The chemical-free process results in an eco-friendly and aesthetically pleasing material that's significantly more durable and stable than conventional timber.

STABILITY

Dimensionally stable in changing weather conditions.

DURABILITY

Highest available durability class for real wood.

ECO-FRIENDLY

Chemical-free modification.

LIGHTWEIGHT

Easy handling and reduced thermal conductivity.

LOW MAINTENANCE

Oil it or not, the choice is yours.
