MADE IN EUROPE

SDS AUSTRALIA

‘CALA’ INDOOR SAUNA

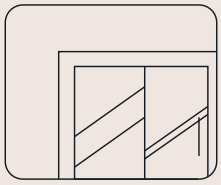

‘Cala’ by Auroom is a premium European-made sauna that exudes luxury and comfort in a sleek, modern design. Crafted from Thermo Aspen.

Because of how comfortable they are, it may come as a surprise to learn that these are some of the smallest sized European saunas on the market. This compact external footprint is ideal for those not wanting to take up much room, as you can fit them in tight spaces such as a bathroom or balcony. It also means you’ll require a smaller electric heater – comparatively resulting in cheaper running costs.

WHERE THE 'CALA' SAUNA'S TIMBER COMES FROM

Aspen

Responsibly sourced
from sustainable forestry
in Estonia and Latvia

SDS AUSTRALIA TAKES PRIDE IN USING TIMBER MATERIALS THAT MEET HIGH STANDARDS OF ENVIRONMENTAL SUSTAINABILITY. OUR SUPPLIER IS COMMITTED TO FINDING BALANCED SOLUTIONS FOR SMART WOOD PRODUCTION THAT MINIMISE ENVIRONMENTAL IMPACT.

Reducing the carbon footprint of a building is a major challenge for the entire construction industry. Manufacturers of building materials can play a major role by investing in product development, energy efficiency and renewable energy to ultimately reduce the environmental impact of their products. It is possible to produce sustainable materials, products and solutions with a smaller carbon footprint.

Thermally modified wood is a durable, chemical-free alternative to other building materials that can extend the life of timber products – helping to reduce environmental impact over time.

The mark of responsible forestry

RESPONSIBLE TIMBER SOURCING

Our supplier carefully monitors where the wood comes from.

They only source the best quality wood from sustainably managed forests around the world. This helps reduce the negative impact of deforestation.

SDS AUSTRALIA

THERMO-MODIFIED WOOD

The heat enhances the wood`s structure throughout.

Steam allows for full control over the modification process.

THERMALLY MODIFIED WOOD

This natural timber's properties are enhanced using just heat and steam. The chemical-free process results in an eco-friendly and aesthetically pleasing material that's significantly more durable and stable than conventional timber.

STABILITY

Dimensionally stable in changing weather conditions.

DURABILITY

Highest available durability class for real wood.

ECO-FRIENDLY

Chemical-free modification.

LIGHTWEIGHT

Easy handling and reduced thermal conductivity.

LOW MAINTENANCE

Oil it or not, the choice is yours.
